

"It was time for a Taege. I needed a strong, fast, and long-lasting post driver to cope with the sever conditions we work in. I've been in the fencing industry for 40 years and have a good knowledge of what is required to get the job done. We need to be able to fit a few of our own customisations and it had to be safe, fast and strong. We bought our first Taege contractor post driver because of the strong reputation. The best feature is the hydraulic spike turner with the benefit of being faster and a whole lot safer. We'll be replacing our other post driver with a Taege".

CHRIS DALEY
Fencetec Contracting

I bought my first Taege post driver on the reputation they have and I've had trouble-free running for 7 years, never putting a welder to it. The new one I've just purchased is great with the extras. The hydraulic spike turner is brilliant for speed and safety and the end shift makes it a very easy one-man operation. It's a very well made local product that does the job well and what it was built for".

UNDISPUTED RELIABILITY

- Market leading innovation
- Strongest drivers on the market
- Purpose built for your requirements
- Preferred by contractors and farmers
